<table>
<thead>
<tr>
<th>Term</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Abeam</td>
<td>Off to the side of a vessel at right angles to the boat’s centerline.</td>
</tr>
<tr>
<td>Aboard</td>
<td>On or in the boat</td>
</tr>
<tr>
<td>Anchor</td>
<td>A device used to hold a boat to the sea bottom</td>
</tr>
<tr>
<td>Aft</td>
<td>At, near or towards the stern.</td>
</tr>
<tr>
<td>Apparent Wind</td>
<td>The wind that flows over a moving boat, which is a result of the “true wind” affected by the movement of the boat.</td>
</tr>
<tr>
<td>Appendage</td>
<td>An underwater fin such as a centerboard dagger board, tleeboard or rudder.</td>
</tr>
<tr>
<td>Astern</td>
<td>Behind the boat</td>
</tr>
<tr>
<td>Backing</td>
<td>Pushing out a sail so that the wind fills it from the opposite side. Used to slow a boat or turn the bow away away from the wind when in irons; back winding—a sail backwinds with the wind funneling on the wrong side.</td>
</tr>
<tr>
<td>Bailer</td>
<td>A device used to remove water from the boat. A bailer is required equipment for a Sabot.</td>
</tr>
<tr>
<td>Batten</td>
<td>Thin fiberglass or wood slats that are inserted in the leech (outside) of the sail for added support.</td>
</tr>
<tr>
<td>Beam</td>
<td>Maximum width of a boat; beam reach—sailing at approximately 90 degrees to the wind with the wind coming from abeam and the sails eased about half way.</td>
</tr>
<tr>
<td>Beat</td>
<td>Advance to windward on alternate tacks; beating—to sail to windward, close-hauled, tacking to make way to windward.</td>
</tr>
<tr>
<td>Bitter end</td>
<td>End of a line.</td>
</tr>
<tr>
<td>Block</td>
<td>A pulley that is encased in its own housing. A block will help to add purchase when pulling on a line. It is important to use the correct size line with the blocks on your boat.</td>
</tr>
<tr>
<td>Bolt rope</td>
<td>Sewn around luff and foot of sails to give added strength to sail where it attaches to mast or boom.</td>
</tr>
<tr>
<td>Boom</td>
<td>Horizontal spar that supports the foot (bottom) of the sail. Named for the sound it makes when it hits someone’s head.</td>
</tr>
<tr>
<td>Boom Vang</td>
<td>A line that runs from the boom to the base of the mast. The vang helps keep the boom down and tighten the back (leech) of the sail.</td>
</tr>
<tr>
<td>Bow</td>
<td>The forward part of a boat, the pointy end.</td>
</tr>
<tr>
<td>Bow Line</td>
<td>Also known as a painter. The bow line is used to tie the boat to the dock or to a tow line. Minimum 10 foot bowline is required equipment. Best if at least ¼” in diameter.</td>
</tr>
<tr>
<td>Broad Reach</td>
<td>Sailing with the wind coming over the rear corner of the boat (quarter), or with the bow approximately 120-160 degrees from the source (eye) of the wind.</td>
</tr>
<tr>
<td>By-the-lee</td>
<td>Running with the wind on the same side as the boom, increasing the possibility of an accidental jibe.</td>
</tr>
<tr>
<td>Burgee</td>
<td>A flag, often triangular, that serves as the unique emblem for each yacht club.</td>
</tr>
<tr>
<td>Capsize</td>
<td>A boat turned over on its side or upside down (turtled).</td>
</tr>
<tr>
<td>Cast off</td>
<td>To untie a line and let it go, or remove a line from a cleat and let it go.</td>
</tr>
</tbody>
</table>
Catamaran  
A boat with two parallel hulls.

Centerboard  
A thin, wide blade going down through the bottom of the hull in the center of the boat. This blade helps to keep the boat from going sideways in the water. It serves the same purpose as a leeboard or a dagger board.

Center of Effort  
Center of sail area, the focal point of the forces generated by the sail area.

Center of lateral resistance  
Center of underwater hull profile, the focal point of the forces generated by the underwater foils.

Cleat  
A fitting where a line can be secured.

Clew  
The aft lower corner of the sail is the clew. It is where the foot and the leech of the sail meet.

Close-hauled  
Sailing as close to the wind as possible.

Close reach  
Sailing with the wind forward of the beam, or with the bow approximately 60 degrees from the eye of the wind.

Clove Hitch  
Similar to two half hitch knot. Most often used to hang fenders over side of boat for protection.

Course  
The direction a boat is steered to reach a destination; or the compass heading; or the angle a boat is sailing relative to the wind.

Crew  
The people who help the helmsperson sail a boat.

Cockpit  
Open part of boat.

Cunningham  
A control line used to tension the forward edge (luff) of a sail, similar to a downhaul.

Dagger board  
Foil raised and lowered vertically used to reduce leeway, different from centerboard which is pivoted instead of raised.

Dinghy  
An open boat, or one partially decked over without a cabin.

Dolly  
A lightweight trailer that is used to move boats from their storage rack to the launch dock.

Duct Tape  
A heavy duty, usually gray tape that will fix almost anything at least temporarily. You can never have enough.

Ease  
To slack a line or sail, ie. To “sheet” out.

Eye of the Wind  
From the source of the wind; directly into the direction from which the wind is blowing from, the no-sail-zone.

Fairlead  
Block or fitting used to change the direction of a running line such a jib sheet.

Feathering  
Sailing upwind so close to the wind that the forward edge of the sail is stalling or luffing, slightly thus reducing the power generated by the sail and the angle of heel without stalling completely.

Fenders  
Cushions to reduce the chafe between a boat and the dock or other boats

Fiberglass  
Most modern boats are made of fiberglass. It is a woven material impregnated with a liquid resin that is very stiff when the resin dries.

Figure 8 knot  
Stopper knot in the shape of an “8” used for the end of a line to prevent it from passing through a fairlead or eye.

Fleet  
For racing purposes, sailors are grouped in fleets according to experience. The Sabot “A” fleet is the more advanced group, with B, C and C3 fleets being progressively more basic.
Flying Junior  The FJ is a two person boat. It is a primary junior training boat, often used in high school sailing events.

Foot  The bottom edge of the sail between the tack (front corner) and the clew (back corner).

Forestay  Forward support of mast, usually wire lead from bow to mast, part of the standing rigging.

Give way  The boat which must alter course to avoid another boat, the burdened boat in the Rules of the Road.

Gooseneck  A hinged fitting on the mast that connects the mast to the boom.

Grommet  A metal ring in a sail that allows lines to be connected through or to the sail. Both the clew and the tack have grommets.

Gudgeon  A “U” shaped fitting on the back of a boat used to connect the rudder to the hull. Most sailing dinghies have two gudgeons.

Halyards  Lines that are attached to the head of a sail and used to hoist sails up the mast.

Head  The top of the sail.

Header  A wind direction change “shift” that brings the wind closer to the bow.

Heading  The direction the boat is travelling at any given moment.

Head Up  Turn the bow of the boat toward the wind.

Heel  To lean a boat over, generally away from the wind.

Helm  1) the tiller; 2) the tendency of a boat to turn toward the wind (weather helm) or away from the wind (lee helm)

Helmsperson  The person who steers a boat, ie. skipper.

Hiking Out  The action of hanging over the side of the boat in order to keep the boat flat on the water.

Hiking Boots  Special boots made of thick rubber that protect and support a sailor’s ankles when using the hiking strap to hike out.

Hiking Strap  A strap, usually stiff, sometimes padded for comfort, attached to the bottom of the cockpit under which a sailor places his/her feet in order to hold the sailor in the boat while hiking out.

Hull  The actual body of the boat.

INSA  International Naples Sabot Association. This is the class association for the Sabot. All Sabot racing fleet members must join.

In irons  A boat head to wind with all sails luffing and no maneuverability.

Inspection Port  A hole in the hull of the boat that allows the skipper to reach inside the hull to make repairs, or sponge out water.

Jib  The front sail on boats with two or more sails. It is small and triangular in shape.

Jibe (Gybe)  Turning the boat away from the wind so the stern passes through the wind and the sail(s) switches sides.

Laser  A popular 14 ft. high performance single hand boat. Used in the Olympics for men’s and women’s single hand event.

Lee  The area sheltered from the wind, downwind; leeward (pronounced loo-ward) – the direction away from the wind, the side of the boat opposite the windward side.

Leech  The aft edge of the sail. The leech connects the head and the clew of the sail.
Life jacket  A jacket type device that provides flotation when sailors are in the water. A Coast Guard approved Personal Flotation Device (PFD) must be worn by all Junior’s while on the docks or the water. Only the vest type jacket is acceptable.

Luff or Luffing  1) The forward edge of the sail nearest the mast, between the tack and the head of the sail; 2) when a sail is waving back and forth as the sail is “eased” out too much or the boat is heading into the wind, the sail is said to be luffing, like a flag flying in the breeze. 3) when the boat turns its bow toward the wind the boat is said to be luffing.

Mainsheet  The line attached to the boom that controls the Mainsail in and out.

Mast  The vertical spar that supports the sail.

Mast blocks  Small pieces of wood or plastic used to support the mast in a forward or aft position.

Mast Tube  A tube on a Sabot that the mast fits into and supports the mast.

One-design  Any class of boat that has specific requirements for size and shape of hulls, sails and equipment to keep them equal, ie. Sabots, FJ’s and Lasers.

Outhaul  A line attached to the clew of the mainsail and used to stretch the sail out along the boom. The outhaul controls the “depth” of the sail.

Paddle  A small board or device used to move the boat in case of emergency or lack of wind. Paddle is required equipment on Sabots and many small boats.

Pintles  The pins on the rudder that are inserted into the gudgeons on the transom of the boat to connect the rudder to the hull.

Planing  When a boat accelerates enough to break loose from its bow wave and ride on top of the water.

Port  Refers to the left side of the boat as well as to which tack a boat is on. If a boat is on “port tack” the wind is coming over the left side of the boat.

Ratchet Block  These are special blocks that rotate in only one direction. They grip the line passing through the ratchet block, relieving some of the “pull” on that line.

Reach  Sail with the wind over the side. i.e A Beam reach is the wind approx. 90 degrees from the bow, broad reach 130-170 degrees from the bow, or close reach with the wind 55-80 from the bow.

Rudder  The movable, underwater blade on the transom of the boat used for steering.

Run  Sail downwind, with the wind aft or nearly so, ie. Sailing with the wind.

Sabot  A popular one person sailing dinghy used mainly in Southern California. They are 8 ft. long and weigh about 100 lbs.

Sail  The part of the boat’s equipment which is usually made from cloth and which is attached to the mast and is the boat’s primary reason for movement.

Sailing Instructions  At each regatta, these are made available to all competitors. They tell the sailors important information about the schedule for the day, starting order, courses to be sailed, etc.

Sea breeze  Wind from the ocean caused by warm air rising over the land and the cool ocean wind replacing it.

Shackle  A U shaped metal ring with a pin to close the "U". It is used to connect objects together, such as connecting the jib halyard to the head (top) of the jib.

Sheets  All lines on a boat which are used to control the in and out motion of sail.

S-Hook  A stainless steel "S" shaped hook used on the end of many control lines that allows for quick hook up and
Shrouds  Wires that hold the mast to the sides of the boat and support the power of the sails. Part of the standing rigging.

Skipper  The person in charge of the boat, usually the person steering the boat.

Skippers Meeting  All regattas begin with a Skippers Meeting. The meeting reviews the Sailing Instructions, special rules and to answer questions. Check Notice of Race (NOR) or Sailing Instructions to determine the time and place.

Stand on  To hold course, the privileged boat in the Rules of the Road.

Starboard  Refers to the right side of the boat. A boat is on a “starboard tack” when the wind is on its starboard side (coming over the right side of the boat).

Stern  Aft (back) end of a boat.

Stopper knot  A knot on the end of a line to prevent it from passing through a block, like the Figure 8 knot.

Tack  1) If a boat's bow passes through the eye of the wind, then it is said to be tacking. 2) The direction the boat is sailing (see starboard and port). 3) The lower front corner of the sail where the luff and the foot of the sail meet.

Telltales  Small lengths of lightweight material attached to the sail near the luff or batten pockets of main sail to indicate the airflow over the sail.

Thwart  A structural board in the center of a Sabot. Juniors should sit next to the thwart when sailing.

Tiller  The long piece of wood that is connected to the top of the rudder. It changes the boat’s direction when moved from side to side.

Tiller Extension  A hinged extension attached to the tiller that allows the skipper to steer the boat while sitting forward or hiking out. This is standard equipment for all boats in the program.

Transom  The very back edge of the boat is called the transom. It is where the name of the boat is often painted.

Traveler  A line or track that controls sideways movement of the boom and mainsail.

Trim  1) Pulling or “sheeting” in a sail. 2) Fore and aft balance of a boat or 3) can be used to refer to the adjustment of sails to take the best advantage of the wind.

True wind  The speed and direction of the wind felt by a stationary object.

Turtle, turn turtle  When a vessel is capsized and completely inverted so that its hull is above the water and its mast is submerged.

US SAILING  The United States Sailing Association. All sailors should belong to this organization. US Sailing sponsors all Junior National Sailing Championship events.

Weather  Toward the wind.

Windward  The general direction the wind is coming from.

Wing and wing  Running before the wind with the main sail and jib on opposite sides of the boat.
